Abstract (en)

[origin: WO2016000687A1] The invention relates to an integral helmet (100), in particular a full-face helmet, preferably in the form of a shell construction, comprising a helmet upper shell unit (120) having an integrated neck unit (140), and a chin protection unit (160) having a jaw clamp (150), wherein the chin protection unit (160) can be detachably connected to the helmet upper shell unit (120) to form the integral helmet (100), wherein the chin protection unit (160) is formed as an open chin bar unit (161) having end regions (162) at a distance from one another for connecting to the neck unit (140), such that, in an assembled state, the end regions (162) form an entirely closed unit together with the neck unit (140). The invention also relates to a method for connecting and/or disconnecting, without using tools, a chin protection unit (160) having a jaw clamp (150) to and/or from a helmet upper shell unit (120) having an integrated neck unit (140), in order to form an integral helmet (100), in particular an integral helmet (100).
