Abstract (en)

[origin: WO2016001583A1] The invention relates to a hairstyling apparatus (1) for curling and smoothing hair, which includes: first and second elongate jaws (2, 3) which are pivotably movable relative to one another, the first jaw (2) having a first casing (6) supporting a first inner planar treatment surface (4), and the second jaw (3) having a second casing (7) supporting a second inner planar treatment surface (5), the inner surfaces (4, 5) being intended for pinching a lock of hair; and at least one heating element (41, 510) intended for heating at least one inner treatment surface (4, 5). According to the invention, the greatest width (l1) of the first casing (6) is no greater than 90% of the greatest width (l2) of the second casing (7). The first casing (6) and/or the second casing (7) is asymmetrical relative to the median plane in a longitudinal cross-section of said first casing (6) or said second casing (7), respectively.
