Abstract (en)
[origin: WO2016001026A1] The invention concerns a part made from composite material comprising a fibrous reinforcement densified by a ceramic matrix, the part having an outer surface and being characterised in that it is coated on at least one part of the outer surface of same with a surface coating in solid form comprising an alloy of silicon and nickel having a weight content of silicon of between 29% and 45% or an alloy of silicon and cobalt.
