Abstract (en)
[origin: WO2016001313A1] The present invention relates to a display device, particularly for motor vehicle. Said device includes a projection module for generating an image with a view to projecting in the normal gaze direction of a user of the display device along an optical path. The display device includes a reflecting and/or displaying element and an element for mounting the reflecting and/or displaying element. The display device moreover includes a retaining element so that the reflecting and/or displaying element is rigidly retained, without changing the shape thereof, between the mounting element and the retaining element in a position that is stationary relative to the mounting element.
