Abstract (en)  
[origin: WO2016000632A1] In a method of controlling and managing one or more electronic devices, a projectable space instance (973) is provided for a control device to create a workspace, wherein an analyzing and controlling (42) tool, a data-monitoring (43) tool and at least one unified tool (41) for driving at least one electronic device is selectively added to the projectable space instance (973); and the projectable space instance (973) is parsed with a projector (241) by the control device to automatically generate a projected workspace (976) corresponding to the workspace to be created via the projectable space instance (973), wherein the data-monitoring (43) tool picks up a data information from the at least one electronic device by way of the at least one unified tool (41), and the analyzing and controlling (42) tool analyzes the data information and controls the at least one electronic device by way of the at least one unified tool (41) according to an analysis result.
