Abstract (en)
[origin: CN205180588U] The utility model relates to a sun shade of convenient control, including umbrella shank, umbrella stick, the umbrella stand that has the rib and illumination component, the umbrella stand is fixed on the umbrella stick, the umbrella stick is inserted and is established on the umbrella shank, still includes a controlling means who is used for controlling the illumination component, and this controlling means includes control panel, touch -control circuit board, keying line board and power supply module's power connection, and above -mentioned illumination component, control panel, touch -control circuit board, keying line board and power connection loop through the circuit and form connection component lighting circuit just the keying line board can open whether stop the work of touch -control circuit board. Compared with the prior art, the utility model provides a controlling means includes touch -control circuit board and keying line board, through with the keying line board on receiver discharging material silo's remote controller can realize the remote control of sun shade, and can realize the touch -control of sun shade through pressing the sun shade, remote control and touch -control can be realized simultaneously to this sun shade promptly, facilitate the use.
