Abstract (en)
[origin: US2017130686A1] A fuel rail includes a pressure accumulator pipe which is configured to receive fuel under pressure and includes a forged tubular body. Made in one piece with the tubular body is an injector mount. A support arranged on the tubular body extends in alignment with the injector mount, with a screw fastener configured to secure the pressure accumulator pipe via the support to a cylinder head of an internal combustion engine.
