Abstract (en)
[origin: WO2016005114A1] Multi-component packaging unit (kit of parts) for reductive decolorization of colored fibers, which comprises separately formulated (I) a container (A) containing a cosmetic agent (a) and (II) a container (B) containing a cosmetic agent (b), wherein the agent (a) in container (A) contains (a1) one or more reducing agents from the group consisting of sodium dithionite, zinc dithionite, potassium dithionite, sodium sulfite, sodium hydrogen sulfite, potassium sulfite, potassium hydrogen sulfite, ammonium sulfite, sodium thiosulfate, potassium thiosulfate, ammonium thiosulfate, hydroxymethane sulfinic acid, aminomethane sulfinic acid, cysteine, thiolactic acid, sulfanyl acetic acid (thioglycolic acid) and/or ascorbic acid, (a2) one or more of fatty constituents from the group consisting of C12-C30-fatty alcohols, C12-C30-fatty acid triglycerides, C12-C30-fatty acid monoglycerides, C12-C30-fatty acid diglycerides, C12-C30-fatty acid esters, hydrocarbons and/or silicon oils, and has (a3) a water content of no more than 10.0 wt% relative to the total weight of the agent (a), and the agent (b) in container (B) has (b1) a water content of at least 30.0 wt% relative to the total weight of the agent (b). The invention further relates to a method for reductive decolorization of the colored keratin fibers using the multi-component packaging unit.
