Abstract (en)

[origin: WO2016005116A1] The invention relates to a sorting device for sorting empty containers according to type and packaging said empty containers in empty-goods collection boxes. In order to provide a sorting device that enables the sorting of empty containers according to type and the packaging of said empty containers already at the empty-goods return point for the consumer, a box buffer designed to hold empty-goods collection boxes, a transport system designed to transfer individual empty containers from a detection unit into the box buffer, and a guiding system for diverting the empty containers from the transport system into an empty-goods collection box are provided.
