Abstract (en)

[origin: WO2016005193A1] The invention relates to a pressing device (24) for pressing a finishing belt against a workpiece surface, comprising a pressure belt (68) and a pressure belt carrier (76) which supports the pressure belt (68) at two mutually spaced-apart support points (64, 66), wherein the pressure belt (68) is fastened releasably to the pressure belt carrier (76), wherein, in order to fix in each case one pressure belt end (82, 84), provision is made of a fixing device (78, 80) that is provided separately from the pressure belt carrier (76), and wherein the fixing device (78, 80) is fastened or fastenable releasably to the pressure belt carrier (76) in a state in which one pressure belt end (82, 84) is fixed to the fixing device (78, 80).
