Abstract (en)

[origin: WO2016005658A1] The invention relates to a package for a material roll, for example, an abrasive material roll. The material roll comprises a package body part (101) and a lid part (102), wherein the package (100) further comprises positioning openings (120) at both end sides of the package (100) for positioning the material roll inside the package (100). Positioning openings are (120) arranged to be formed when lid part (102) of the package (100) is closed. The invention further relates to a material roll, a material dispenser and a use of a package with a material roll.
