Abstract (en)

[origin: WO2016005204A1] The invention relates to a radially expandable tubular metal element (1) comprising at least one ring seal module (2) on the outer surface thereof. According to the invention, the ring seal module (2) comprises at least one ring seal made from an inflatable material, known as the inflatable seal (22) and disposed between two annular abutment elements (21) secured to the outer surface of the tubular element (1).
