Abstract (en)
[origin: WO2016005677A1] The invention relates to a touch-sensitive partition wall or household furniture item (10) comprising a surface (14) that can be touched by a user. The invention also comprises a matrix array (S) with rows (16) and columns (18) of sensors disposed against or in the surface (14) that can be touched, and a connection interface (20) for connecting the matrix array (S) of sensors to an electronic control system (22). The connection interface (20) can be programmed for the individual activation/deactivation of each row (16) and column (18) of the matrix array (S) of sensors.
