Abstract (en)

[origin: WO2016005253A1] The invention relates to a shielding container (10) for radioactive materials, comprising: a container peripheral wall (12); a container bottom (14); and a container lid (16) that closes off the container interior; wherein at least the container peripheral wall is surrounded by a shield (38). In order to ensure an adequate shielding effect while achieving economical production, the shield (38) according to the invention is a sheet-metal strip wound around the container peripheral wall (12).
