Abstract (en)  
A driver's cabin (10) of a rail vehicle comprises a driver's cabin structure (12) comprising a crash-resistant structure (14) surrounding an inner survival space (22) and an energy-absorbing structure (18) located in front of the crash-resistant structure (14) and surrounding an inner crushable space (24). A driver's desk structure (46) is located inside the driver's cabin structure (12) and attached to the driver's cabin structure (12). The driver's desk structure (46) comprises a deformable framework of profiles (48) located in the inner crushable space (22) of the driver's cabin (10) and at least one crash-resistant crossbeam (54, 56) fixed to the crash-resistant structure (14) and located behind the deformable framework of profiles (48), in the inner survival space (22).
