Abstract (en)
[origin: EP3168397A1] Multipurpose articulated support for furniture doors, in particular a support for furniture elements that can be raised and/or lowered, in which there are at least two friction brakes (6a) (6b) coaxial with the axis of rotation (7), an interdisc washer (18) being located between the adjacent faces of the friction brakes (6a) (6b), which interdisc washer (18) stays immobile relative to the first arm (1) during the relative movement of the first (1) and second (2) arms; and in that there is a swivelling ratchet (14) with a width substantially the same as the sum of the thicknesses of the existing friction brakes (6a) (6b).
