Abstract (en)

[origin: EP3168409A1] Watertight seal for upper and/or lower rails of enclosures that prevents the entry of water, wind or other elements, so that the dwelling in which it the seal is fitted does not have an entry of moisture, mainly, and other elements such as wind, dust, etc., comprising a first cap placed on the end of a first rail and a second cap placed at the end of a second rail and facing the first cap; the first cap comprises a vertical housing over the entire length of said cap in which a gasket is placed which provides the seal when it is in contact with the facing side of the second cap.
