Abstract (en)

[origin: CN106953473A] The invention relates to a housing 1 for a vehicle, the housing defines an inner space 132 closed by a cover 50, the inner space is desinged to receive at least one printed circuit board 40 which is formed for a control device of an electric motor integrated in the electric compressor, the housing 1 comprises at least one positioning device 11 which is designed to position the printed circuit board 40 in the inner space 132, the positioning device 11 passes through the printed circuit board 40, so that the free end 13 of the positioning device 11 protruding from the surface of the printed circuit board 40, the free end 13 cooperates with the cover 50 so as to allow the cover 50 to be positioned in a predetermined position relative to the housing 1.
