Abstract (en)

[origin: MX2016014836A] The invention relates to a security device (16) for a person comprising a wristband (20) and a case (22) held by the wristband (20) and comprising: a receiver (28) A processor capable of associating each data with a degree of dangerousness and capable of sending data to be communicated and capable of transmitting data to be transmitted, an interface capable of communicating data sent, Transmitter (30) capable of transmitting transmitted data. The equipment (16) is adapted to operate in at least two modes of operation, each mode being associated one-to-one with a degree of dangerousness threshold, the data which the processor (32) is suitable for sending in a mode being the data Associated with a degree of dangerousness greater than or equal to the degree of dangerousness threshold of the mode in question.
