Abstract (en)
[origin: WO2016008902A1] The invention relates to a protective helmet with a built-in mobile visor comprising a shell (1) comprising an open face zone (11) and a visor (2) that is mobile between a raised position and a lowered position in which it at least partially covers said face zone (11), the visor (2) being connected to the shell (1) by an elastic element, in which helmet the visor (2) comprises an upper bearing surface (23) and the shell (1), on a periphery of the face zone (11), comprises a receiving surface (16) for receiving the upper bearing surface (23) of the visor (2), and in which helmet, when the visor (2) is in the lowered position, the upper bearing surface (23) of the visor (2) is in contact with the receiving surface (16) of the shell (1) and the elastic element tends to press the upper bearing surface (23) of the visor (2) firmly against the receiving surface (16) of the shell (1).
