Abstract (en)
[origin: WO2016008678A1] The invention relates to a domestic dishwasher (1), comprising a body (2), at least one loading level (10), at least one guide rail (12), along which the at least one loading level (10) can be linearly displaced between a first and a second position of same, wherein the at least one loading level (10) in the first position is arranged at the bottom and inside the body (2) and in the second position at the bottom and at least partially outside of the body (2), at least one guide arm (15, 16) which holds the at least one guide rail on the body (2) in a pivotable manner for a movement of the loading level (10) between the second and a third position of same, wherein the at least one loading level (10) is arranged in the third position at the top and at least partially outside of the body (2), and a guiding device (19), which guides the at least one guide arm (15, 16) along a guide track (20), which at least partially deviates from a circular path.
