Abstract (en)

[origin: CA2955126A1] The invention relates to a device for fixing and aligning cutter blades for a system for fine comminution and/or for emulsification of semisolid, plastic or plastoelastic substances, in particular raw substances for food production, comprising means for the detachable fastening of the cutter blades (3) to a cutter drive shaft (4). Furthermore, according to the invention, a single-part or multi-part support or carrier body (6) is provided which extends under or over the cutter blades (3) and which is connected, radially at the inside, to the cutter drive shaft (4), wherein a positively locking and/or non-positively locking connection is formed at least radially at the outside between the associated end of the support or carrier body (6) and the respective cutter blade (3).
