Abstract (en)

[origin: WO2016008464A1] The invention relates to an inkjet printing method, wherein a printhead of an inkjet printer is directed in the direction of a substrate to be printed, and wherein ink drops are generated in the printhead of the inkjet printer, which ink drops, after being discharged from the nozzle of the printhead, are directed into a zone with locally increased temperature, such that the volume of the drops is actively reduced during the flight phase to the substrate. The invention also relates to an assembly for carrying out the method.
