Abstract (en)

[origin: WO2016008741A1] The invention relates to a tank device (10), in particular in a vehicle, comprising a pressure tank (12) for storing fuel (14) and a fuel line (16) for filling the pressure tank (12) which extends from outside of the pressure tank (12) through a tank opening (18) up to a free line end (20) in the interior of the pressure tank (12), wherein the fuel line (16) in the pressure tank (12) has at least one line outlet (28) through which the fuel (14) can flow out of the fuel line (16) into the pressure tank (12), and wherein the fuel line (16) between the tank opening (18) and the free line end (20) has such a flexible line section (26) such that the flexible line section (26) moves when the pressure tank (12) is filled.
