Abstract (en)
[origin: WO2016008692A1] A dosing cap (1) is proposed for a cleaning agent container (20), having a cup-shaped cap body (3) with an open end part (4) and a closed end part (5) and a brush device (2) for the pre-treatment of objects to be cleaned, the brush device (2) being configured detachable from the brush attachment arranged on the cap body, wherein the brush attachment is configured to be pluggable in such a way that the brush attachment (2) may optionally be either plugged onto the closed end part (5) or onto the open end part (4). Further, a cleaning agent container (20) having such a dosing cap (1) and a use of such a dosing cap (1) for the pre-treatment of laundry to be cleaned is proposed.
