Abstract (en)
[origin: WO2016008695A1] The invention relates to a filling device (10) for filling liquid-containing products into containers (38), said filling device comprising a product space (14), which opens into a filling valve (20), and comprising, in the region of the filling valve thereof, at least two valve elements (22, 29) movable in relation to each other by an actuator, wherein said valve elements in the region of a sealing surface rest against each other in the closed position and are spaced apart from each other in the opened position, wherein at least one of the two valve elements (22, 29) up to the product comprises a plastic lining (32; 33). Such a filling device is hygienic and easy to clean.
