Abstract (en)

[origin: WO2016008923A1] The application relates to a roadway track (10) for a vehicle (T), said roadway track having a face for driving on and being able to be rolled up on itself and intended to be laid on the ground and having a rolled-up position and a deployed position in which said roadway track extends substantially parallel to the ground. The roadway track comprises at least one first track portion (14) and one second track portion (16), the first and second track portions being connected to one another by a pivot connection (18) having a pivot axis (A) that extends in a direction substantially perpendicular to the face for driving on, by virtue of which pivot the first track portion can pivot with respect to the second track portion about the pivot axis so as to form a bend (V).
