Abstract (en)
[origin: WO2016011081A1] An apparatus adapted for the removal of foreign matter from the exterior of windows of a building can include a cleaning unit and a positioning unit. The cleaning unit can extend a depth between a front side confronting the work surface and a back side opposite the front side. The cleaning unit can include a cleaning agency. The positioning unit can be engaged with the cleaning unit to move the cleaning unit among a plurality of different positions relative to the building.
