Abstract (en)

[origin: WO2016009039A1] The holster (10) for a handgun (20) having a trigger guard and a barrel (205) comprising: - a housing (105) for the handgun comprising a top opening (110) for the passage of at least part of the handgun, - a wedge (115) for holding the handgun in the housing, - a first push-button (120) for positioning the wedge: - in a position referred to as the "retention" position, in which the wedge is positioned in the trigger guard so as to prevent the handgun from being extracted from the housing when the first button is released or - in a position referred to as the "released" position in which the wedge is positioned out of the trigger guard when the first button is engaged; comprises: - a flap (125), mounted to rotate about a hinge (130) positioned along a long side of a transverse opening (135) of the housing, said transverse opening (135) being positioned facing the barrel and forming: - in what is referred to as a "closed" position, a face that covers the transverse opening (135) and - in what is referred to as an "open" position, a guide for the sliding of the handgun toward the transverse opening and - a second push-button (120) for opening the flap that opens the flap when the second button is engaged.
