Abstract (en)

[origin: WO2016008660A1] The invention pertains to a microstructure (12) for adsorbing/desorbing at least one gas component of a gas supplied to the microstructure (12), the microstructure (12) comprising a semiconductor substrate (14) with a bottom (16) and a top (18), wherein a plurality of microchannels (20), which extend from the bottom (16) to the top (18) of the semiconductor substrate (14), are provided. A top surface (22) of each of the microchannels (20) is configured to adsorb and/or desorb the at least one gas component when the gas is passed through the microchannels.
