Abstract (en)
[origin: WO2016008472A1] The invention relates to a modular housing output system provided for conducting electronic signals out of a housing (1) by means of electric contacts (5). The modular housing output system boasts a particularly large panoply of variants as a result of the modular use of different housing output ports (4). Housing output ports (4) providing very different connection possibilities can be connected to the housing (1) via a uniform interface.
