Abstract (en)

[origin: WO2016010491A1] The present invention relates to a method for operating an induction heating cooker (1) comprising a plurality of induction coils (2) in association with induction resonant inverters (4) to provide multi-zone induction coils (3), a power switch driving circuit (5) driving power switches associated with the induction resonant inverters (4), a pan detection circuit (8) and a user interface (14) having a graphic display (12), the induction heating cooker (1) further comprising a vitro- ceramic glass (7) surface containing no surface indication as to suggestible placement of a pan (6).
