Abstract (en)
Disclosed is a helmet including a helmet main body (100) having a front opening (150), a shield (200) having both ends coupled to the helmet main body for opening or closing the opening, a locking support member (300) provided on one side of the opening, a locking unit (400) including a shield mount (410) fixed to the shield, and a fastening member (430) having one end pivotally rotatably connected to the shield mount via a coupling shaft (420) and a remaining end for being fastened to or unfastened from the locking support member, and a fixing unit (500) for preventing the fastening member from being pivotally rotated about the coupling shaft by a prescribed angle or more relative to the shield mount in a state in which the fastening member is fastened to the locking support member, thereby keeping the fastening member fastened to the locking support member.
