Abstract (en)  
The present invention provides a multi-compartment cartridge for enclosing at least one substance, wherein such multi-compartment cartridge has filtration capabilities. The multi-compartment cartridge of the present invention comprises a first housing; a first filter member; and a cover, wherein said first housing comprises a tapered cylindrical body with an upper edge, a lower edge, an opening, a bottom wall with a plurality of through-apertures. Said second housing comprises a tapered cylindrical body with an upper edge, a lower edge, an opening, a bottom wall having a substantially convex portion with a plurality of through-apertures. Said second housing and said first filter member are inserted in the opening of the first cylindrical body. The multi-compartment cartridge of the present invention optionally comprises a second filter member.
