Abstract (en)

[origin: WO2016012071A1] The invention relates to a device at least for moving a mass, wherein, according to the invention, the device comprises a hollow cylindrical airbag (1) which is flow-coupled to a gas generator and which is fixedly arranged by one end (1. 1) on an object, wherein a pull element (2), on which the mass to be moved is arranged, is fastened in the region of an opposite end (1. 2), wherein, upon deployment of the airbag (1), a pulling force (F) acts on the pull element (2) in such a way that the mass can be moved. Moreover, the invention relates to a vehicle having such a device.
