Abstract (en)  
[origin: CA3172648A1] A snowmobile comprises: a frame; a drive assembly supported by the frame; an endless track operably coupled to the drive assembly; a powertrain assembly including an engine and a transmission supported by the frame and operably coupled to the drive assembly; a plurality of skis operably coupled to the frame, each of the skis having an outer edge and a first width being defined between the outer edges of the skis; and a body assembly generally surrounding the frame and including a hood panel and fenders, a second width being defined between outermost surfaces of the fenders, and the second width being less than the first width, each of the fenders including a flat bottom surface parallel to a ground surface and positioned laterally inward from the outermost surface of the fenders, the flat bottom surface being adjacent the endless track.
