Abstract (en)

[origin: WO2016012674A1] The invention relates to an accessory (1) for closing a water dispensing device (2). Said device (2) includes: - a chamber provided with a dispensing outlet (3) that is to be supplied with water from the chamber; and - an access opening connecting the outside of the device to the inside of the chamber. The accessory (1) includes: - a closing cap (20), designed for being removably attached to the access opening so as to seal same by means of a first attachment means (30) accessible from outside a compartment (13) and the chamber; and - a top cover (21), designed for being removably attached to the closing cap (20) so as to form, together with the closing cap, the compartment (13) containing electronic means for monitoring the device (2). Said cover (21) is attached by means of a second attachment means (31A, 31B, 31C), separate from the first means (30) and accessible from outside the compartment (13) and the chamber. The invention also relates to accessories for water dispensing devices.
