Abstract (en)  
[origin: WO2016012344A1] A junction box housing (3) for a photovoltaic panel (4) comprises a first housing part (1) and a second housing part (2), wherein the first housing part (1) has a first contact surface (5) by means of which the first housing part (1) can be arranged directly or indirectly on a surface (7) of the photovoltaic panel (4), and wherein the second housing part (2) has a second contact surface (6) by means of which the second housing part (2) can be arranged directly or indirectly on the other surface (8) of the photovoltaic panel (4), and wherein the first contact surface (5) is spaced apart from the second contact surface (6) so that a slot (9) for receiving the photovoltaic panel (4) is provided by the first contact surface (5) and the second contact surface (6), characterized in that the two housing parts (1, 2) are connected to each other via at least one guide (10) and are designed to be displaceable relative to each other along an assembly movement (M) so that the thickness (D) of the slot (9) is adjustable.
