Abstract (en)
Height-adjustable table (10), comprising a top (2) supported by at least one leg (1a, 1b, 1c) and first adjusting means for adjusting the height of the top, wherein the at least one leg is assembled from an upward inclining elongate telescopic body (1a, 1b, 1c) which is provided on its end directed toward the top (2) with a top support (3, 4) coupled to the top (2), further comprising second adjusting means for moving the top (2) in a horizontal direction which are coupled by coupling means to the first adjusting means such that, during a change in the height of the top (2) by means of the first adjusting means, an associated movement in horizontal direction is compensated by an opposite movement in horizontal direction by means of the second adjusting means.
