Abstract (en)

[origin: WO2016016550A1] The invention relates to a system (4) for positioning and retaining an insert (3) in a mold (1) for forming a motor vehicle part (2) made of plastic (MP). Said system includes at least one partially overmolded insert (3) and comprises at least one retaining member (5) for retaining the insert (3) in place in a given position. Said system is characterized in that the retaining member (5) includes a member (6) for inserting an insert, and the inserting member (6) comprises a means (7) for locking the insert onto the retaining member (5) by translating the insert (3) in the direction of the inserting member (6).
