Abstract (en)

[origin: WO2016016143A1] The invention relates to a heat exchanger (20) for cooling a fluid, having an accumulator (10), a housing (11) and a pipe (2) shaped into a coil (1), wherein a gap is formed between the accumulator (10) and the housing (11) in which the pipe (2) shaped into a coil (1) is arranged, wherein a force-closed connection is formed between the housing (11) and the coil (1), wherein the force-closed connection is produced by a plastic deformation of the housing (11). The invention further relates to a method for producing a heat exchanger.
