Abstract (en)

[origin: WO2016016056A1] The invention relates to an ultrasonic sensor device (1) for a motor vehicle, comprising an ultrasound membrane (3), an actuator (4) for moving the ultrasound membrane (3) and a control device (7) for actuating the actuator (4), wherein the ultrasonic sensor device (1) has a storage device (9), in which a production date of the ultrasonic sensor device (1) is stored, and wherein the control device (7) is designed to determine an age of the ultrasonic sensor device (1) on the basis of the stored production date.
