Abstract (en)
[origin: KR20160016567A] The present invention provides a consumer product capable of displaying a digital TV (DTV), a mobile, and 3-dimensional (3D) display, and an interaction method. Especially, the present invention relates to a system and a method for user interaction with the Web in a 3D space through the consumer product. In addition, the present invention provides a plurality of user interaction scenarios, wherein multi users can search through different content with one device without real interference at the same time, and makes interaction between screens of the users possible. The interaction method includes the following steps: displaying web content including at least one object on a first screen; detecting at least one object selection by a first user; and displaying the selected object or information linked to the selected object in a 3D form on a second screen.
