Abstract (en)

[origin: WO2016019146A1] Disclosed is a system and method for generating a coordinated presentation. Content selected by a user is curated for inclusion in the coordinated presentation, and a plurality of images are captured for inclusion in the coordinated presentation. A first data stream associated with the curated content and a second data stream associated with the captured images are received, and a first arrangement of content associated with at least some of the first and second data streams are output. Telemetry information associated with at least one of a gyroscope and accelerometer is processed and at least some of the curated content is modified in accordance with at least some of the telemetry information and/or at least one of the plurality of images comprised in the second data stream. Further, respective content associated the two data streams are integrated to generate the coordinated presentation.
