Abstract (en)
An apparatus for cleaning a floor surface including: an upright part including a user graspable handle; a base assembly, connected to the upright part, including a base part having: a first passage with a respective inlet; and a second passage with a respective inlet; a device for effecting movement of the base part between respective first and second conditions; a suction source for providing suction to one or both of the first and second passages; wherein as the base part is moved between its first and second conditions by the device, the suction provided to one or both of the first and second passages is changed.
