Abstract (en)
[origin: EP3176496A1] A lighting device for producing scenographic effects is provided with a frame (11); at least a first light source (12a; 12b) supported by the frame (11) and designed to emit a light beam; two reflectors (13), which are facing each other and are arranged so as to reflect, at least in part, the light beam emitted by the first light source (12a; 12b); the reflectors (13) are hinged to the frame (11) and are selectively movable to enlarge and close the light beam between a maximum opening position and a minimum opening position.
