Abstract (en)

[origin: US2016037941A1] This childcare chair includes a seat for receiving the child and a support for the seat, the support carrying members for bearing on the ground. The members are articulated in rotation relative to the support between at least two distinct positions, in each of which the members are deployed relative to the support and which include a high position, in which the members bearing on the ground keep the seat at a second height relative to the ground, and a low position, in which the members bearing on the ground keep the seat at a second height relative to the ground, the second height being strictly smaller than the first height.
