Abstract (en)
[origin: WO2015075280A1] The invention relates to a hair-styling composition, containing at least one propellant gas and/or a thickener, characterized in that the hair-styling composition also contains a polyurethane urea, which has no ionic hydrophilizing groups and which is dissolved in a solvent or solvent mixture, the solvent being composed exclusively of one or more monohydroxy-functional alcohols or a solvent mixture consisting of exclusively organic solvents, which solvent mixture contains ≥ 50 wt% of at least one monohydroxy-functional alcohol, with respect to the total mass of the solvent mixture. The invention further relates to the use of the hair-styling composition to shape, solidify, and/or fix hair and to a method for shaping, solidifying, and/or fixing hair by using the polyurethane urea solution. The invention further relates to a method for producing a hair-styling composition, in which method the polyurethane urea solution is used.
