Abstract (en)

[origin: WO2016020869A1] The present invention relates to a machine for shaping at least one annular element (AE), which comprises a support frame (2), a shaft or mandrel (3), a support plate or table (4) of at least one annular element (AE), a bucking component (5), a first (6a) and a second (6b) roller element, actuation means (7) intended to move the first (6a) and the second (6b) roller element, and displacement means for displacing said support plate or table (4). The invention also relates to a method for shaping at least one annular element.
