Abstract (en)

[origin: WO2016005284A1] The invention describes a method for producing sacks or bags with ventilation openings, comprising a coated fabric made of oriented polyolefin material, in which - a perforation tool is used to introduce a number of ventilation openings having a diameter of less than 0.8 mm into a flat or tubular web or portions thereof, - sacks or bags are produced from portions of the flat or tubular web by forming at least one bottom. The invention is characterized by regions which are provided with at least one folded edge having ventilation openings with a reduced diameter.
